Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 1-35 have been cancelled.

Claims 36-38 are pending.

Priority

The pending claims have priority to 4/5/95 because the peptide X1X2X3... is not found in 08/231565.

Information Disclosure Statement

The IDS filed 8/11/03 and 7/3/01 have been considered and initialed copies of the PTO-1449's are enclosed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawakami et al PNAS vol. 91 p. 3515 (4/94) or US 5620886 (filed 3/18/93) or WO 94/21126 in view of Campbell, Monoclonal Antibody Technology, Eds. Elsevier Science Publishers Chapter 1, pages 1-32 (1986).

Kawakami et al disclose the sequence of MART-1 in Figure 1. As seen by the attached sequence alignment, the sequence is identical to the claimed SEQ ID No. 2.

US 5620886 discloses the sequence of MART-1 in the depicted amino acid sequence of SEQ ID NO. 1 and this is also seen in the WO which is related to the US patent. The WO discloses SEQ ID No. 1 and as seen by the attached sequence alignment, SEQ ID No. 1 (the amino acid part) is identical to the claimed SEQ ID No. 2.

The only difference between the instant invention and the reference is that the claimed invention is directed to antibodies to SEQ ID No. 2

Campbell clearly states that it "is customary now for any group working on a macromolecule to both clone the genes...and make monoclonal antibodies to it

Art Unit: 1642

(sometimes without a clear objective for their application) (page 29, second column, bottom).

Thus, in view of Campbell, it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to make monoclonal antibodies to MART-1. In view of this, one of ordinary skill in the art would also be compelled to make polyclonal antibodies because the production of polyclonals is inexpensive as compared to monoclonals.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheela J Huff whose telephone number is 703-305-7866. The examiner can normally be reached on Tuesday 5:30am-11:30am and Fridays 6:00am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa can be reached on 703-308-3995. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
